Sample Violence Hazard Assessment / Inspection Checklist

CUPE members provide valuable services to members of the public in a variety of situations which can become difficult, or are more likely to expose them to violence. This form has been created to assist health and safety committee members to identify aspects of the workplace or work tasks that may place workers at a higher chance of being exposed to a violent incident. Not all work aspects listed in this document will be applicable to all workplaces. It is advised that health and safety committee members create a separate inspection from using only the aspects that are potentially relevant to their workplace, and that also allows for additional notes to be recorded.
