

## ***Workshop 1 – New Forms of Privatization Task Sheet***

1. What are the forces driving this new corporate strategy – why is it happening, and how is it being pushed?
2. What are the impacts of this type of privatization, for clients/patients/users, for workers, and for communities?
3. What alternatives is the union putting forward in this example? What other alternatives come to mind?
4. Does this example bring to mind other fights that weren't raised in the first activity? If so, record these on the symbols.
